

Qualitair

Premium

System Construction

Built from quality aluminium components specifically designed to cool all beer cellars economically with very low noise weatherproof units.

No mechanical thermostats, solenoid valves or expansion valves means far higher reliability.

System Features

*Low noise condensing units with SilentFlow fan

*Full flow evaporator design with SilentFlow fan, SAVES over 100 Watts of energy per hour.

*Large self defrosting evaporator

*TouchScreen Controller

*Designed by Installation engineers

Maintenance

Qualitair can maintain their own cellar cooling systems through UKCC allowing you 5 years of FREE warranty. Lease plans available can include purchase, service and warranty. Package deals to include every part, service, labour and installation plus funding for Pub Chains & Breweries. Ask for details.
